Users can remotely rekey a network of HAIBE devices from a physically secure location with the HAIBE over-the-air/net key, and experience better performance through high-latency connections with embedded Transmission Control Protocol/Internet Protocol (TCP/IP) acceleration. KG-250X/KG-250X-FC combines high-speed Type 1 network encryption that goes beyond HAIBE requirements, with cyber defense technologies and display software including Trusted Cyber Sensor (TCS) to communicate more securely via Internet Protocol (IP) and gain useful information about your security location. The KG-250X/KG-250X-FC enables IP traffic to route more efficiently and reduces network overhead with built-in OSPF and PIM. PIM.
