ID-4 Instant Identification System

The numbers throughout the text refer to the pictures at the end of this guide.

Introduction

The Polaroid ID-4 System is designed to provide highly secure photo-identification cards. The system includes a camera, a laminator and a decutter. These fit on the base, which contains the power supply. The base is placed on top of the cover during operation, or inside for storage.

The camera photographs the subject's face and data card. It requires a validating signature or seal for additional security. The ID photograph is inserted into the decutter and cut to the appropriate size for the ID card. The laminator seals the diecut picture into a protective plastic pouch.

The camera uses Polaroid Polacolor ER Type 669 instant film. Each film pack produces eight 3 1/4 x 4 1/4 in. (8.5 x 10.8cm) prints.

The ID-4 system is available in three basic configurations, shown on the last page of this guide:

Standard camera Produces two horizontal ID pictures on each sheet of film.

Vertical-badge camera Produces two vertical ID pictures on each sheet of film. (These are generally used for hanging-badge ID cards.)

Single-card camera Produces one ID picture on each sheet of film; these are used for CR-79/CR-80-size ID cards. This system has a single-card CR-79 or CR-80 decutter.

Set-up

Select a working area

You will need an area about 8 x 10 ft. (2.4 x 3m) that is not exposed to extreme temperatures. (Avoid doors, windows, etc.)

As shown in sketch (1), you also need:

A Table, 29-30 in. (76cm) high, for the ID-4 System.

B Electrical outlet (grounded, where applicable).

C Wastebasket.

D Backdrop to place behind the subject. This should be at least 30 in. (76cm) square and made of non-reflective material such as felt or velvet.

E Chair for the subject, 17-18 in. (45cm) high.

Assembly

Assemble the system in the area where you plan to use it.

1 Release the latches, then remove the cover from the base. Turn the cover upside-down and place it on the table (2).

2 Unwind the power cord. Feed the plug and long cord out through one of the doors near the bottom of the cover. Position the short cord in the opening near the top of the cover (3).

3 Place the base on top of the cover and latch it (4).

4 Place the laminator on the base: slide the bottom of the laminator into its slot on the base (5), then lower it into position.

5 Wrap the laminator cord around the bottom of the laminator several times (6), then plug it into its outlet (7-F).

6 Plug the power cord into its socket (7-G), and then into an appropriate electrical outlet.

UNIT MUST BE GROUNDED. POWER CORD HAS THREE-PRONGED GROUNDED PLUG, WHICH MUST BE PLUGGED INTO APPROPRIATE OUTLET. DO NOT, UNDER ANY CIRCUMSTANCES, REMOVE GROUND PRONG FROM PLUG.* DO NOT LET POWER CORD HANG OVER FRONT EDGE OF TABLE OR COUNTER OR TOUCH HOT SURFACES. ARRANGE CORD SO IT WILL NOT BE TRIPPED OVER OR PULLED. IF EXTENSION CORD IS NEEDED, USE CORD WITH GROUNDED PLUG* AND SUITABLE POWER RATING. CORDS RATED FOR LOWER WATTAGE THAN UNIT MAY OVERHEAT. (*THIS APPLIES ONLY IN COUNTRIES WITH GROUNDED ELECTRICAL SUPPLIES.)

The Bosch company makes cooking and electrodromers, and has a high-end line of electrodromers. If you have one or more of these devices and you need a user manual, there are some places you may be able to find one online. Get Bosch user manuals directly from the company to apply for Bosch user manuals directly from the company through the Internet, go to the company's website and open the service tab. The company offers a complete document set for each product offered. This includes the necessary information on how to use, care and clean Bosch electrodromers. To search the Site for the Specific User Manual that matches its device, enter the model number, which is also referred to as the company as a number (E-NR), according to the Bosch website. There is a second way to locate Bosch user manuals on the Bosch website, and that is to configure an account My Bosch. Then, when you have started session on the website, you can add your products, so at any time you start session, you can easily navigate to the user's information related to the product you own. Other reasons for opening a My Bosch account include access to discounts on accessories for applications, discounts on cleaning products that you may need and an offer from a service plan that suits your application, according to Bosch. Visit the nearest Bosch dealer to request information If you wish to speak with a Bosch representative in person, you can still use the Internet to help you find the nearest Bosch dealer. The company's website has a distributor locator you can access by clicking on the icon where to buy. Then, it has the option to allow your device to provide its location to the website or you can enter your city, postal code or its from the street. The locator tool then brings information about the location of the nearest Bosch distributors. Use an online manual library to find Bosch manuals Visit an online manual library that publishes the owner's manuals for many types of products, such as a Yamaha user manual or a Honda HondaManual and manuals for handheld electronics. To use these types of websites, enter the name of the appliance you have in the search bar, or search for image if the site offers that option. There may also be a list of published model numbers that show the Bosch Appliance manuals. The website has available. Online auctions for Bosch user auctions. If you are looking for a hard copy of the owner's manual for your Bosch device, you may find one on an online auction website. Look at the site using terms as the manual of the Bosch owners and the number of models or the genetic name of your device. More of AskSwered.net Skip to smoother content, smaller, safer, more Young look: Please, please! We picked up the main secrets. Who does not obsess, even a little, on your skin? After all, it is our biggest organ, the more prone to show the effects of the elements (such as the sun and the wind) and the aging process. Of course, you can not control the weather or the hands of time. But there is a lot that you can do to keep your skin maximally. Continue reading for the last advances, from high-tech seals for fine lines to innovative skin cancer, which will help prevent and overcome beauty floors and methods of methods alike.Problem No. 1: Redness of the LoblowndBlame that perpetual years of exposure to UV rays of Sun, which can cause capillaries to explode, explain Debra Jaliman, MD, professor of Dermatology at Mount Sinai School of Medicine The city of New York and author of the rules of the skin. As you get older, your skin also doubles, making blood vessels more visible. Another culprit common: rosacea, a chronic condition that involves the swelling of the blood vessels under the skin. Its redness comes and goes, in response to triggers, such as sun exposure, scheme, warm climate, wind, hot baths and spicy foods. What seems compared on the cheeks, nose, chin or forehead. Rosarcea can cause bumps similar to acnÀ ©. Rshide facial redness with green green team Like Dermablend, says Dr. Jaliman. If you have Rosacea, your dermatologist may prescribe antibiotics or topical products containing sulfur or azelaic acid, which have anti-inflammatory properties. The use of sunscreen is a need to prevent outbreaks. Look for those that contain physical blockers of zinc oxide or titanium dioxide, which tend to be less irritating than chemical ingredients, says Dr. Jaliman. Meanwhile, you can get visible zapped blood vessels in your Derm's office with a laser. Most people require two to three treatments at approximately \$300 to POP. Problem No. 2: Solar Damage and LOWNOWN Lines "As you age, your body slows down your collagen and elastin production," says Jessica Krant, MD, assistant Dermatology professor at Sunty DownState Medical Center in New York City. That reduces the elasticity of your skin. The result? That occasional-fronted groove, frustrating the eye or eye of the eyes becomes permanently engraved on his face. As for the stains of the age, thanks to all those days that he spent as a teenager dropping the SANS sunning, exposure to UV rays over time, causes an increase in the number of cells that produce pigments on his skin, says Dr. Krant. What looks like the lines of the thin; Brown or black strips flat in areas exposed to the sun, such as their face, chest and hands. EDAD RX Blades: pharmacy laundering creams, which contain 2 percent hydroquinone or a natural ingredient called kojic acid, can help. But if you have a lot of damage, you'll probably need something stronger. Her dermatologist may prescribe 4 percent of hydroquinone, but talking to her about risks, is forbidden in Europe for security concerns. Your DERM can also prescribe lightening ingredients such as tretinoin and hydrocortisone. If they don't work, consider pulse light sessions or intense, which cost \$ 300 to \$ 500 each time. Fine lines: products that contain retinol accumulate collagen, helping to soften wrinkles. The OTCs are good for the fine lines and the feet of the crows, says Dr. Krant; Ask your Doc for a retin-a retin-a if you need more power. Botox or Dysport injections prevent wrinkles from the forehead. Cost: \$500 to \$750. Next Page: Problem No. 3: Allergy and irritated skin [Stage outbreak] Problem No. 3: Allergy and irritated skin Decomposition If you have an eruption marked by dry and crispy red patches, you probably have contact dermatitis. Or you've touched a substance you're allergic to, like nickel or latex, or you have a nonallergic reaction to chemicals like detergents. It may also have eczema, which is usually triggered by fragrances irritants, cold weather, allergens or sometimes even stress. Eczema tends to be spicy and sometimes leads to small blows that filter liquid. If you have bites that move throughout the day, you have hives. Acute urticaria that suddenly appear is due to a food or medical allergy. Chronic hives, which can last up to six weeks, are more common and not always allergic. About 20 percent of the time, they are activated by cold, heat, light or exercise. Otherwise, they can be caused by an autoimmune disorder or the reaction of your body to a disease. In some cases, there is no clear cause. RxlF sudden hive, take a Benadryl and call your doc ASAP; you may be having a severe allergic reaction. Contact dermatitis usually disappears when you avoid anything that activates it. Free-selling antihistamines such as Zyrtec and hydrocortisone creams can also help, but if the eruption continues, see a derma or an allergist. Recipe cortisone creams can relieve chronic eczema and urticaria; severe cases of chronic urticaria can be treated with prescription drugs such as cyclosporin, which help suppress the immune system. The descentRespire deeply: Not all lumps and blows are cancerous. The most common are seborreic kerates (SKs)—brown or brown growthsWithout pain that tend to grow with age and can run in families. Other non-problematic growths include warts and tags of the skin. Warts are caused by human human being (HPV), and they are contagious but not potentially fatal. It is more likely to catch one if it has a cut, which explains why they tend to appear on their fingers. Skin labels often appear in the armpits, due to fragmentation. For the same reason, you can get them if it is overweight or has large breasts. What seem to those who seem the small blows, plans, harsh, tanned or brown that thicken slowly on the face, chest, shoulders or back. The warts are small and grainous growths that they feel raw and full of potholes. Skin labels protrude and can have a small stem that connects with your body. The Rxises growths are harmless, but you can choose because your dermatologist eliminates them, either by freezing them with liquid nitrogen (cryosurgery), burning them (Electrocautery), or, if they are large, Zapapeando with a LÀ to be. However, he always checks them, since sometimes it is difficult to say if a growth is benign or potentially cancerous. A © copyright health.com. All rights reserved.
